Alessandra Ribeiro Ventura Oliveira

Universidade Católica de Brasília

Professor of the Graduate Program in Gerontology of the Catholic University of Brasília - and of Practices in Pediatrics - Medicine of the Catholic University of Brasília.

Pediatrician - Health Department of the Federal District - SES/DF.

Collaborating researcher "The Susy Safe project" since 2018

"Ingestion of foreign bodies and medication poisoning by children"

Foreign bodies ingestion: our experience

Foreign body ingestion are commonly seen in children and mentally handicapped adults. This is a very important public health problem in Brazil and in some countries of Sul America. As many cases aren't witnessed and the symptoms aren't specific, a high level of diagnostic suspicion by pediatricians is very important, avoiding complications resulting from late treatment.
